INDICATIONS AND BENEFITS

Globaldry keeps newborn pigs dry, warm, clean and comfortable.

- Efficiently dries piglets after birth
- Provides thermal-insulating layer on the skin
- Acts as sanitizing agent

Globaldry helps in litter management by:

- Keeping litter dry, clean and comfortable
- Reducing ammonia and foul odor
- Acting as sanitizing agent

RECOMMENDED APPLICATION

Recommended Application Rate for Cattles:

- **Barn/Box:** 50 – 100 g/m² once a week
- **Breeding calves:** 100 g/m² 3 times a week

Recommended Application Rate for Poultry:

- 50 to 100 g/m² of litter, once to twice per week depending on age and litter moisture levels
- 50 to 100 g/m² in nests, as needed

Recommended Application Rate for Swine:

- **Piglets:** Lightly coat the newborn pigs' bodies immediately after birth, to dry and provide thermal and antibacterial protective coating
- **Sow:** 40 g/sow/day or 100g/sow, 3 times a week
- **Farrowing Pen:** Lightly dust the area to maintain dryness, warmth and sanitary condition
- **Growers in Litter:** 50 to 100 g/m²
